Subject Index to Volume 15

A

Adjustment costs
  deriving a firm's price elasticity of supply, 91
Agricultural policies
  and migration in a United States–Mexico free trade area, computable general equilibrium analysis, 673
Anti-drug strategies
  QALY as an estimator of social benefits of, 329
Asia–Pacific region
  coordination of macroeconomic policies in the OECD,13
  MSG Model, 15
Australia
  a simplified multilateral trade model for dairy products in, 141
  applied general equilibrium analysis and policy reform, 393
Austria
  Hungary comparison with, computable general equilibrium model, 581

B

Beef cattle industry
  United States, effect of government policies on, time-series analysis, 117
Bertrand competition
  effect on domestic industry, 49

C

Canada
  a new test of optimal monetary policy on, 179
Carbon dioxide
  estimating energy production, 500
  reducing emissions in the United States, 491
  subglobal reduction initiatives, incentives to join, 473
China, postreform
  economy, modeling, 545
  macroeconomic policy, sectoral implications of, 277
Collusion
  equations for domestic versus foreign industry, 60
Colombia
  inflationary trends in, 463
Commodity
  market models, government intervention in, 415
  price fluctuations, macroeconomic adjustments in developed economies, 335
Consistent conjectures
  equations for domestic versus foreign industry, 60
Corn
  price of, effect on United States beef prices, 125
Courtnot competition
  effect on domestic industry, 49

D

Dairy policies
  domestic, international market adjustment in a simplified model, 141
Deficit news
  effect on interest rates, 1
Domestic industry
  injury suffered by subsidized imports, 49

E

Econometric model
  Malawi, measuring effects of external shocks and policies, 313
Elasticities
  supply, in presence of adjustment costs, 91
Environmental policy instruments
  using general equilibrium models to choose, 521
European community
  a simplified multilateral trade model for dairy products in, 141
  and United States, trade compromises between, 199

European Economic Community (EEC)
Spain's integration in, 157
European Monetary System (EMS)
German unification and, quantitative analysis, 353
External shocks and policies
measuring effects of, econometric model for Malawi, 313

F

Foreign aid
and policy reforms, Gambia economic recovery, 251
France
impact of commodity price fluctuation and macroeconomic adjustments, 335
Free trade area (FTA)
United States–Mexico agreement, analysis using an 11-sector, three-country CGE model, 673

G

Gambia
economic reform program, 251
Game theory and interest group approach
trade compromises between European community and United States, 199
General equilibrium analysis
applied, contribution to policy reform in Australia, 393
applied, robustness of, 99
computable, agricultural policies and migration in United States–Mexico free trade area, 673
dynamic, of corporate tax integration, 63
explanation of, 66
intersectoral and intertemporal efficiency effects, 63
General equilibrium modeling
applied, of international tax competition among Group of Seven Countries, 653
applied, symposium on, *introduction to special issue*, 469
choosing environmental policy instruments using, 521
computable, Hungary, comparison with Austria, 581
for assessing subglobal carbon-reduction initiatives, 475
Germany
impact of commodity price fluctuation and macroeconomic adjustments, 335
unification and European Monetary System, quantitative analysis, 353
Government
intervention, in commodity market models, 415
policies, effects on United States beef cattle industry, time-series analysis of, 117
strategic policy behavior and product differentiation in an international burley tobacco trade, 229
Group of Seven Countries
international tax competition, applied general equilibrium model, 653

H

Hong Kong
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
HUMUS model
equilibrium model applied to the Hungarian economy, 626
Hungary
comparison with Austria, computable general equilibrium model, 581
trade adjustment policies, 625

I

Imports
demand behavior, structural change in, Korea, 223
subsidized, effect on domestic industry and comparison of market structures, 49
Indonesia
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
Industrial countries
structural aspects of Asian countries, 20
Inflationary trends
in Colombia, 463
Input-Output techniques
to explore the structure of an Italian public conglomerate, 235
Integration
and structural analysis of an Italian public conglomerate, 235
Interest group and game theory approach
trade compromises between European Community and United States, 199
Interest rates
effect of deficit news on, 1
Italy
impact of commodity price fluctuation and macroeconomic adjustments, 335
structural and integration analysis of public conglomerate, 235

J

Japan
impact of commodity price fluctuation and macroeconomic adjustments, 335

K

Kenya
stabilization policy, potency of, 427
Korea
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
import demand behavior, structural change in, 223

L

Linear programming discriminant analysis (LPDA)
comparison with other decision-modeling approaches, 309
modeling international loan portfolios through, 297
Loan portfolios
international, modeling through linear programming discriminant analysis, 297

M

Macroeconomic
adjustments and commodity price fluctuations in developed economies, 335
model, analysis of issues related to German unification, 353
policy of OECD, implications for Asia–Pacific region, 13
policy, sectoral implications for postreform China, 277
Malawi
econometric model, measuring effects of external shocks and policies, 313
Malaysia
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
Market adjustment
international, domestic dairy policies and, simplified model, 141
Market structures
effect of subsidized imports on domestic industry, 49
Mexico–United States
free trade area, agricultural policies and migration in, computable general equilibrium analysis, 673
Migration
and agricultural policies, in United States–Mexico free trade area, computable general equilibrium analysis, 673
Monetary policy
optimal, 179
MSG Model
equations in the Asia–Pacific model, 41

N

Neo-Ricardian model
effect on interest rates, 1
New Zealand
a simplified multilateral trade model for dairy products in, 141

O

Optimal monetary policy
a new test of, 179
Organization for Economic Cooperation and Development (OECD)
coordination of macroeconomic policies, implications for Asia–Pacific region, 13

P

Philippines
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
Policy reform
and foreign aid, Gambia economic recovery, 251
survey of computable general equilibrium applications, 401
Product differentiation
strategic government policy behavior and international burley tobacco trade model, 229

Q

QALY
estimator of social benefits of anti-drug strategies, 329
Quantitative analysis
German unification and European Monetary System, 353

S

Singapore
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
Spain
effects of elimination of barriers to trade, 166
effects of financial liberalization, 169
effects of fiscal harmonization of indirect taxes, 171

integration in the EEC, 157
Stabilization policy
in Kenya, Tanzania, and Uganda economies, 427
Structural
and integration analysis of Italian public conglomerate, 235
Systematic sensitivity analysis
applied to general equilibrium models, 99

T
Taiwan
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
Tanzania
stabilization policy, potency of, 427
Tax
competition, international, among Group of Seven Countries, applied general equilibrium model, 653
corporate, integration, dynamic general equilibrium analysis of, 63
Thailand
impact of coordinated versus uncoordinated policy responses in OECD on Asian economies, 13
Time-series analysis
government policy effects on United States beef cattle industry, 117
Tobacco
international burley trade model, strategic government policy behavior and product differentiation, 229
Trade
adjustment policies, Hungary, 625
compromises, European Community and United States, 199
industry policy reform in Australia, 395
international burley tobacco trade model, 229

U
Uganda
stabilization policy, potency of, 427
United Kingdom
a new test of optimal monetary policy on, 179
impact of commodity price fluctuation and macroeconomic adjustments, 335
United States
a new test of optimal monetary policy on, 179
a simplified multilateral trade model for dairy products in, 141
and European Community, trade compromises between, 199
impact of commodity price fluctuation and macroeconomic adjustments, 335
reducing carbon dioxide emission through carbon taxes, 491
United States–Mexico free trade area
agricultural policies and migration in, computable general equilibrium analysis, 673
